ENVISIONIT | COMMUNITY HEALTH CARE

Location-Based Data Solutions For Community Health Care Clinics

Location-Based Data Solutions to optimize workflows and improve patient satisfaction.

Location Data for Improved Operational Visibility and Increased Efficiency

- Monitor, evaluate and optimize workflows from check-in to check-out
- Increase patient throughput
- Improve patient satisfaction
- Trigger mobile notifications to other team members in the event of an urgent situation
- Integrate location data with other existing communication or process-related solutions like nurse call
- Minimize patient wait times
- Automate updates of care provider status and availability
- Automate updates of exam room status and availability

ENVISIONIT | COMMUNITY HEALTH CARE

Optimizing Efficiency, Increasing Satisfaction

envisionit

Location-Based Data Solutions software provides access to current and historical location information for every tag in your system. Ideal for:

- **Overall Increased Visibility:** Know exactly who is in your clinic and where they are at all times
- **Staff and Patient Management:** See where providers and patients are (waiting area, hallways, exam rooms, x-ray) and for how long they've been there
- **Data-Driven Management:** Analytics to generate reports, track performance and evaluate trends over time so you can make adjustments to staffing and other resources to support your practice
- **Staff Safety:** A single button press to request assistance and alert safety and response team members
- **Fully Integrated:** Automate processes by integrating with your existing nurse call or central displays

Customize communications on mobile devices using the mVision® mobile app for information at your fingertips.

- Decide who gets notified and for what types of events
- Set escalation paths to ensure no event goes unattended
- Maintain full visibility of all mobile acknowledgments in the app for reporting and traceability
