

Technology Partners We're Better Together

Healthcare Customer Needs

Our Customers Are Your Customers

We believe that partnering with you can provide our customers a superior product experience that is of tremendous value. Having served the healthcare industry for over 40 years, we have worked with thousands of acute and long-term care facilities around the world. We understand that our customers are looking for fully integrated solutions that help improve their operations and protect their patients, staff and assets.

Why Partner with Secure Care Products?

Secure Care Products is a leader in the design and manufacture of specialty active RFID hardware and software that provides security solutions for healthcare.

With over 40 years supporting the healthcare industry and providing protection for loved ones across the life spectrum, we have a deep understanding of our customers and strive to meet and exceed their needs.

Secure Care Products proudly pioneered the first wander management system. Less than 10 years after this, we brought to market the first infant protection system. And today we have designed a superior location-based data solutions (LBDS) that offers best-in-class accuracy at ± 1 foot.

Innovative Solutions for Security and Efficiency

ENVisionIT® Location-Based Data Solutions (LBDS)

- Our technology means Secure Care's location-based data solutions offers the best accuracy (± 1 foot) with less hardware
- Seamlessly integrates with existing Door GUARDIAN® and KinderGUARD® systems to offer a fully integrated security solution for medical facilities
- Ideal solution for staff safety – staff duress tags send alerts within 2-3 seconds of button push
- Easily scalable solution for any size facility to track and monitor patients, staff and assets

Door GUARDIAN® Wander Management Solution

- The first company to provide a wander management solution
- Ideal solution for memory care units, psychiatric wards and other residents who may be high risk for elopement
- Fully ID-based systems to easily identify specific patients
- Secure Care Products software provides: clear visual display of floorplans, detailed alarms/alerts, quick report generation and more

KinderGUARD® Infant Protection Solution

- The first company to offer an infant protection system
- Cutband technology is the gold standard for infant security
- Automatic enrollment means a transmitter becomes active as soon as it's applied to a child
- Actively monitored transmitters "check in" every 7-10 seconds
- Ideal for labor and delivery units as well as pediatric departments and hospitals
